The Badenhausen Boiler

Exemplifies the latest and most important advance in steam engineering.

It has **positive, unrestricted** and **continuous circulation,** far beyond any other design.

In consequence of this, it has a capacity completely beyond the range of any other boiler.

It not only eliminates all moisture from the steam, but also **superheats the steam 5 to 10 degrees,** which feature alone insures a saving of 5% to 10%, according to the type of engine used.

Send for preliminary catalogue. Get on our mailing list.

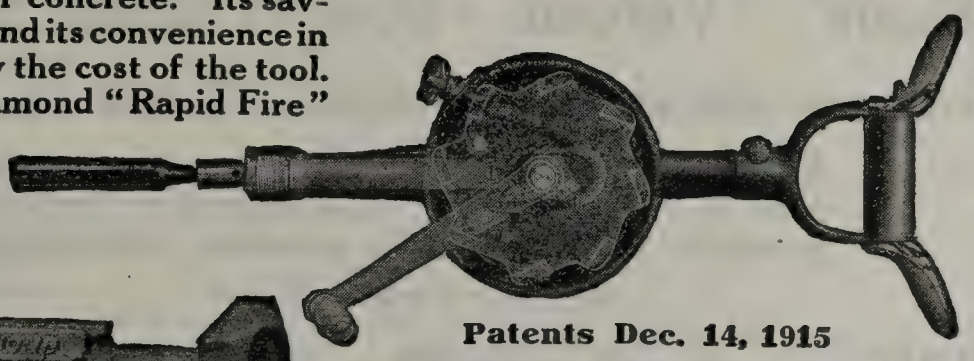
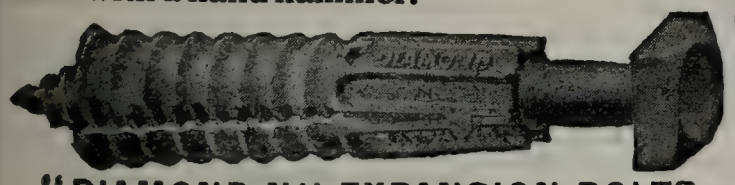
Diamond "Rapid Fire" Drill

THE most economical means of drilling holes in brick, stone or concrete. Its saving in time and labor, and its convenience in use will in a short time pay the cost of the tool.

One man using the Diamond "Rapid Fire" Drill can with less effort deliver more effective blows, with eight to twenty times the speed, than with a hand hammer.



Patents Dec. 14, 1915



"DIAMOND N" EXPANSION BOLTS
For Use With Any Lag Screw

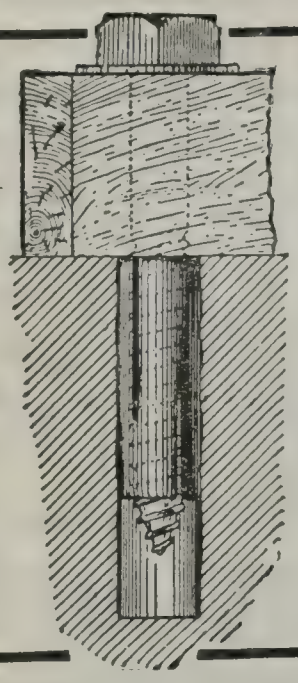
DIAMOND EXPANSION BOLTS

for securely fastening any kind of material to brick, stone or concrete.

"DIAMOND N" SCREW ANCHORS
For Use With Any Wood Screw

DIAMOND EXPANSION BOLT CO.

Manufacturers of DIAMOND SPECIALTIES
89 WEST ST., NEW YORK



THE LITTLE GIANT EXPANSION SLEEVE

is *Unbreakable* and *Rust Proof*, has an even and uniform expansion the entire length of screw inserted, allowing the screw to make its own thread in the sleeve. The expansion begins at the first turn of screw, causing it to expand the outside of sleeve firmly against sides of hole, making a bind that is impossible to start, no pipe sleeve or wedge nut being required. These anchors are made of pure lead. The screw cuts its own thread easily.

Your attention is called to our New Anchor for ¼" Drill to be used with No. 4-5-6-7 and 8 Wood screws. Being the strongest small anchor made, they will not crack the marble or tile. Holds two tons—weight 5 ounces (official U. S. Government Test).

CARY'S UNIVERSAL BOX STRAP

THE STRAP WITH THE "NAME"—THE KIND IT PAYS TO USE

This Strap is made of extra soft annealed steel of great tensile strength through which nails can be driven without first punching holes. The bosses stiffen the edge of the Strap and protect the nail heads when case is moved along the floor.

Made in four widths—½, ⅝, ¾ and ONE INCH.

Put up in coils of 300 feet each, and packed 20 coils in a case.

Every coil is equipped with our patent metal hanger, which makes it a complete reel that can be hung anywhere without floor space being occupied.

We manufacture a complete line of Metal and Wire Box Straps, Box Fasteners, Seals, Clasps, Corrugated Joint Fasteners, etc. Write for Our Catalog

LINK-BELT
SILENT CHAIN DRIVES

CONSERVE POWER

ADOPT this highly-efficient drive for every service that requires positive, non-slip power transmission. It is flexible as a belt—positive as a gear—more efficient than either.

Link-Belt "Safety-first" casings should be used where flying grit and abrasive dust are in the air. Many power users are adopting them on all drives. For particulars address nearest office.

The Caldwell Clutch Is Trouble-Proof

—because it is strong and simple in construction, safe and easy to operate and efficient in doing its work. One Lever Controls it; One Screw Adjusts It—both in plain view.

The brake band, lined with Ra-Bestos brake lining, grips the entire circumference of the friction ring and therefore transmits the greatest amount of power possible. All important parts are steel.

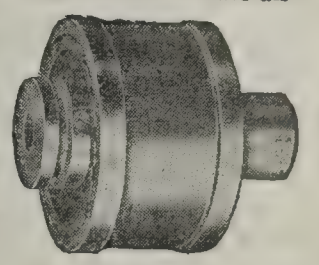
"Just Oil It. Thats all"



Patented

Akron Clutches are smooth and positive in action. No chattering, clatter or other noises. All clutches equipped with bronze bushings. Protected against dust and dirt. All parts enclosed. The friction parts are metal working in oil, and there is practically no wear. Pulley is not part of clutch and is easily interchanged. Will slip if load exceeds horsepower, thereby avoids wrecking other parts of transmitting appliances. Very simple, easily adjusted by means of one screw.

The Donley Insert

The Donley Insert

is a malleable iron anchorage to which, when imbedded in concrete, anything may be bolted. It is used wherever anchorage to ceilings, walls or columns is required for shafting, trolley and conveyor tracks, sprinkler systems, machinery, heating and plumbing pipes, etc.

Notice the design of the Donley Insert. It has been demonstrated to engage enough concrete and also the correct distribution of metal to develop the strength of the bolt for which it is designed. Made for ½", ⅝" and ¾" bolts.
